IMPLEMENTATION OF ENTRE@VET

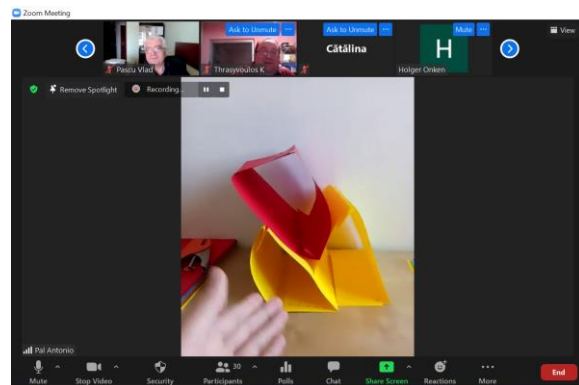

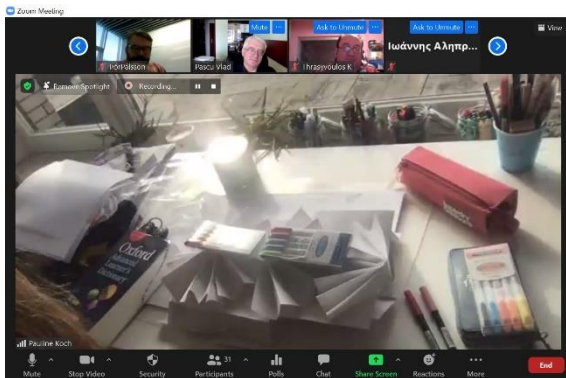

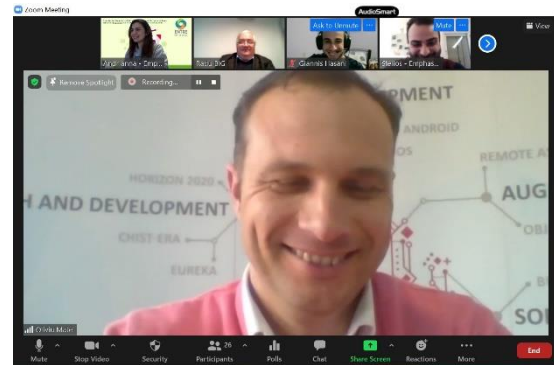

Pilot Testing Phase

The implementation phase of the programme took place in Greece, Romania, the United Kingdom and Cyprus. VET students and VET teachers had the opportunity to learn more about the programme, the e-learning platform and to take part in various activities regarding the development of entrepreneurial skills. Due to the restrictions related to COVID-19, most of the events took place virtually.

Blended Mobility Event for VET learners (C2)

A blended mobility event for VET learners was organized between the 2nd – 4th March 2021. The event was planned to take place in Cyprus, but due to the restrictions imposed by the COVID-19 pandemic, the event took place virtually. The event offered a great opportunity for students around Europe to exchange good practices, create networks and take part in different workshops related to entrepreneurship. The participants also had the opportunity to take part in a discussion with Mr. Oliviu Matei, Owner of HoliSun and Professor at the Technical University of Cluj.

FINAL MEETING

The ENTRE@VETSCHOOLS project is reaching a successful end!

The last meeting of the project was organized virtually on the 7th April 2021. During the meeting, partners had the opportunity to discuss the feedback received from the pilot testing events in the partner countries and also during the C2-Blended Mobility Event for VET learners. Additionally, partners discussed the last activities of the project including the national multiplier events which aim to inform VET trainers/ career advisors and related key stakeholders about the products and materials developed!
